

**NO MORE FOGGED MIRRORS!**

LET THE SUN SHINE IN

**“TAKE A GOOD LOOK AT YOURSELF!”**

**MIBBO®**  
MIRROR DEFOGGING SYSTEMS

# Finally, clarity in every

**M**irror, mirror on the wall...

after a shower or bath, even the fairest of them all have a hard time seeing themselves. In even the finest bathrooms, steamed mirrors make it nearly impossible to carry out the simplest everyday activities such as applying makeup or shaving. And even if you're careful, sometimes that can be quite painful!

**A**lmost everyone has their own chosen method of fighting the war on steamed mirrors... there are a number of well known techniques people have tried in the past. Now that there is MIRRO®, there is no longer a need to exert the outdated towel method or implement the time and energy consuming hairdryer procedure.

**M**IRRO® works on almost all accessible bathroom mirrors and is easily installed in a matter of minutes. Simply remove the protective liner, adhere and connect – finished! MIRRO's gentle warmth provides an absolutely clear mirror every time. Best of all, this luxury fit for a queen costs but pennies to operate... it uses less energy than most light bulbs.

# bathroom!

LET THE SUN SHINE IN

**M**IRRO® is manufactured to the highest safety standards in the industry. Our patented system is the result of over 25 years of research and development in mirror heating technologies by our engineers in Germany. It has been tested repeatedly by independent laboratories and has been certified by TÜV Rheinland for Product Safety and recognized by Underwriters Laboratories.

**S**imple, luxurious and effective, MIRRO® simply makes bathrooms more functional. Extensive research in polymer thick film technologies has led to the creation of this intelligent mirror warming system, one which holds the mirror surface temperature at just a few degrees above ambient – just enough to prevent tiny water molecules from accumulating on the mirror surface.

**A** proven track record for comfort and safety is important. MIRRO® brand heating elements are the only TÜV approved and UL recognized mirror warming system for up to 230 V – just one of the many reasons leading hotels in Europe such as the Hilton and Grand Hyatt have chosen to upfit their bathrooms with MIRRO® mirror defogging systems.

MIRROR DEFOGGING SYSTEMS

# You will see: It is just that easy.

LET THE SUN SHINE IN

**W**ith just a few simple hand movements, you can completely eliminate the irritation of a blurry mirror while continuing to enjoy the pleasures of a long, steamy shower. Installation is as easy as this:\* Remove the protective layer from the adhesive side of the mirror heating element, press firmly against the clean surface on the reverse side of the mirror and connect to the bathroom power source. MIRRO® is most effective when wired in conjunction with the lighting system – that is, when the light above is turned on, MIRRO® is activated and begins protecting the mirror surface.

**M**IRRO® is available in a variety of standard shapes, sizes and voltages. Custom design and fabrication is also available. It can be designed and manufactured to be installed directly onto bathroom mirrors, or as a component in finished bathroom mirror systems and medicine cabinets. Let us tell you more about this revolutionary product – we guarantee that you will be pleasantly surprised at just how easy, effective and affordable this touch of luxury can be.

**T**he MIRRO® mirror defogging system is available in the following standard sizes:

Standard Sizes\*\*:

|              |        |       |
|--------------|--------|-------|
| 290 x 340 mm | 230 V/ | 25 W  |
| 300 x 500 mm | 230 V/ | 35 W  |
| 280 x 850 mm | 230 V/ | 50 W  |
| 400 x 400 mm | 230 V/ | 40 W  |
| 400 x 500 mm | 230 V/ | 50 W  |
| 400 x 600 mm | 230 V/ | 50 W  |
| 500 x 700 mm | 230 V/ | 60 W  |
| 600 x 600 mm | 230 V/ | 80 W  |
| 600 x 800 mm | 230 V/ | 85 W  |
| 700 x 900 mm | 230 V/ | 120 W |
| Ø 350 mm     | 230 V/ | 25 W  |
| Ø 600 mm     | 230 V/ | 60 W  |

\* please refer to local building and electrical codes for additional installation requirements

\*\* all sizes are available in 12V, 120V, or 230V
